Individually adjustable

PAKI 3

The PAKI 3 is a compact and autonomous light fixture with 3 led spotlights.

Designed for maximum versatility PAKI 3 is equipped with a neodymium magnet and can be placed, fixed or hung from most surfaces or structures. Its 38cm length and its light weight, enhances PAKI's portability and widens its field of possibilities.

The accessory kit allows access to spaces which are more difficult to reach, thanks to the Velcro strap and the magnetic counter plate.

Paki 3 is **remote-controlled (RF equipped)** and the 3 Cree XPG2 leds per spotlight can be mounted in **RGB or CCT tunable white**.
