

T4 UNIVERSAL LIGHTING MAST

Straight or Inclined

The wireless Hermatwist® assembly system allows you to change the angle of the head in just a few seconds

T4

The T4 lighting mast and its range of functionalities is designed to bring to light your most exceptional events, **inside as well as outside**.

Autonomous, its integrated Lithium-ion battery offers up to **110 hours** of use (depending on the setting of the dimmer) and frees you from the installation issues created by the many power cables.

Its different extension tubes allow you to **vary the height of the product** depending on the type of venue or event you wish include the product in. The T4 holds a promise : an **easy installation and handling** thanks to its **integrated wireless DMX**; change the color temperature or the intensity of the light in a second.
